Oldtimer of Glory Hills Buried.

George Hartum, who farmed in Glory Hills district since 1907, passed away in an Edmonton hospital on Friday last, aged 54 years. He had been ailing and was taken to an Edmonton hospital on Friday morning for treatment, and died shortly after his admission.

Funeral was held Sunday afternoon from his late residence. Service was held in Glory Hills Evangelical Reformed church by Rev C H Reppert, pastor.

He leaves to mourn his loss his loving wife, 5 daughters—Mrs A Elisher, Miss Amelia, Lydia, Irene and Viola; 3 sons—John William, Harry; 2 sisters—Mrs Hy. Schiede man and Mrs Conrad Miller.

Searle Precipitation Report No. 4.

(Compiled from 182 Rain Gauge Reports.)

Combining the precipitation which occurred last autumn during Aug., Sept., Oct. and the rains which have fallen Apr. 1 to June 15, and weighting for wheat acreage, the moisture conditions in Alberta June 15 was 92 p.c of normal as compared with 97 the previous week and 98 the week before that.

Taking the 3 prairie provinces as a unit the weighted average June 15 was 88 of normal as compared with 90 p.c at the same time last week and 89 p.c for the week before that.

The use of moisture by the young plant up to this stage of its growth is comparatively small. From now on, however, the moisture utilization increases rapidly. Due to this fact, therefore, the importance of the moisture situation is accentuated at this time.

Committees for Sports Day.

President—Geo. Oppertbauer. Treasurer—W. E. Lewis.
Secretary—P. Comisarow.
Sports—A. E. Michael, Mac Stewart, Fred Miller, W. Irwin, Dr. Oatway, Henry Trapp, D. E. Moyer.
Dance—Otto Dreitsa, W. Kelly, H. Miller.
Booth—S. Comisarow, W. Kelly, L. Miller, G. H. H. H.
Finance—F. W. Yeats, G. J. Bryan, W. E. H. Lewis.

Evjen-Lauxman.

On Sunday, June 26th, at the Glory Hills Reformed Church, Miss Agnes Lauxman, daughter of Mr and Mrs William Lauxman, of Glory Hills, became the bride of Mr Harold Perceval Evjen, son of Mr and Mrs Peter M. Evjen, of Inga district. The ceremony was performed by Rev. C. H. Reppert, the pastor.

School Pupil Injured.

On Friday afternoon last the pupils of two of the rooms at the Public school were taken by their teachers for a hike. The pupils of Miss McDonald's room went east; and the boys and girls from Miss McKinlay's room went west up the Litzberg road. While the pupils in the latter group were engaged in play, Miss Shirley Goebel, daughter of Mr and Mrs Wm Goebel, had the misfortune to fall and break her leg. She was brought to Stony, where her injury was attended to.

Miss Goebel suffered a similar injury to her leg a year or two ago, when she slipped on the icy pavement while on her way home from school.

July First, Stony's Sports Day

Chairman A. E. Michael of the Sports Committee has issued the corrected list of the sports events, and noticeably on this list is the addition of contests for the youngsters, which section, it is said, will be under the supervision of Mr F. S. Miller.

Horse racing still has its followers here, as the many inquiries for tickets of this sport prove. With races for horses and ponies around the nearby districts, patrons wonder why this sport is not one of the items of the program. The matter was discussed at a recent sports meeting, and those present were informed by an "authority" of the subject that even one race would necessitate the construction of a double fence around the whole track. This was considered to be quite an expensive operation, and the matter was dropped.

In addition to the new overseas badges with which the Sports Day police will be equipped, a local factory is said to be making a five-pointed star for the Big Chief of Police to wear that day.

The CCF Meeting.

The Canadian Co-operative Federation forces invited Stony Plain on Monday last, under the leadership of Wm. Irvine, ex-M.P. An organization meeting was held in the town hall in the afternoon, when plans were made under discussion for holding a series of meetings throughout the country. Among those present were Donald MacLeod and Geo. MacLeod.

A meeting open to the public was held in the evening at which Mr MacLeod presided. Mr Irvine gave one of his inspiring addresses, in which he bled the present provincial government for their sins of omission, going after, in particular, Dr. Clegg, the Minister of Health, and discussing the management of the Dept. of Education.

ELECTRIC ORGAN TO ASSIST FIRST NATIONAL EUCHARISTIC CONGRESS

The Eucharistic Congress dates back to 1874 when Mlle. Tamisier of Tourne, France, felt called to inaugurate a movement for a greater public devotion to the Holy Eucharist. She succeeded in arranging the first Congress in Avignon in June of that year. This movement soon became worldwide. In 1910 Montreal was host to over 100,000 visitors from all parts of the Globe.

This year history will be made at Quebec during Canada's first National Eucharistic Congress, where for the first time the services will be led by organ music through the medium of a Northern-Hammond Organ, manufactured in Montreal by Northern Electric—the very latest development of the science of sound. It is actuated by electrical impulses and cannot get out of tune. There are over 1500 now in use in Churches of all denominations throughout the world.

Gold Where It's Found

"There's gold where you find it."

It's an adage familiar to prospectors who dare the lonesomeness of the wilds, the heat of the summer and the snow and ice of the winter in the hope of some day striking that elusive vein which shall put an end to their toils. It is not only current among prospectors, but the truth of its assertion has recently been perpetuated in movieland as the title to a popular film.

The adage gives point to many a saga of the hinterlands where men have grown grizzled and grey; in a vain search for the precious metal and have finally lain down pick and shovel at life's end, their labors unrequited. One feels stirred to pity such stories and is tempted to wonder whether they might not have found a better reward if they had pursued some other venture, less romantic but more remunerative. Perhaps they might have done better had they observed and heeded the call of opportunities close at hand instead chasing the rainbow which led them far afield.

Other Opportunities

Similarly one may be led to speculate at times whether some of our governments are not passing up an opportunity which lies at their door to develop to its utmost, latent wealth which might perhaps be readily attainable, or developed to a much greater extent than it has been in recent years; whether or not some of the efforts which are being made to search for hidden riches in remote areas might not return steadily cumulating dividends of greater value in the long run if they were turned to the cultivation of prospects outside our back doors.

Specifically, reference is made to the tourist traffic from south of the international boundary line—a plan of great value that will soon be ripe for the plucking if the field is cultivated with care and the product is nursed with an eye to encouragement of a greater yield at harvest time.

That there are great potentialities in this comparatively new found industry, and that it would respond readily if the necessary encouragement were given, there can be no doubt, when one reads of the growth it is making with the comparatively small effort that is being made to develop it. One finds, for instance, without any undue effort on the part of the people of this country and their representatives, that it is an industry that is growing rapidly and materially and one is inclined to wonder whether greater efforts would not bring astonishing results, and in a very short time.

For instance, latest statistics, just to hand, reveal that the total estimated expenditures in Canada of tourists from other countries during 1937 amounted to approximately \$294,682,000 compared with \$251,299,000 in 1936, a gain in one year of \$43,383,000 and of this amount a total expenditure of \$27,710,000 is attributed by the Department of National Revenue at Ottawa to tourists from the United States.

A Growing Industry

The total for last year is not far short of the value of the Western wheat crop in an average normal year, though it is true that the bulk of the benefit is derived by Eastern Canada and British Columbia. Nevertheless, when this comparatively new-found gold mine yields an increase of approximately 15 per cent, in one year without any great effort being made to develop it, one is warranted in anticipating that more vigorous prosecution of effort would result in increasing production by leaps and bounds.

The figures amply demonstrate that the "ore" is available in much greater quantity and that Americans only need greater encouragement to visit this country in increasing numbers and thus assist in improving our revenues.

If Western Canada is to share to a greater extent in this potential source of wealth it is absolutely essential that more attention be given to the highways of the country. More links are needed between the highways on both sides of the international boundary, and greater efforts should be made to improve and maintain in a high state of efficiency the highways already built.

While it is true that the Canadian west has much of interest to offer to tourists from the south, more could be done to add to the attractions. There is much land in the prairie countries which is not of sufficiently high quality to farm profitably and some of this land could be converted into parks, game preserves and beauty spots under a program of reforestation.

Publicity Needed

And when more good roads are available and more and wider areas are developed as parks and playgrounds, not only for visitors from the south but also for our own people, the necessity of making these attractions well known to prospective tourists by a well directed and co-ordinated publicity program should not be overlooked.

It is true that something has been done in this direction in the past but depression has impeded progress. Now, it appears, however, that the time is approaching when much more can and should be done and the value of such an undertaking will not be hampered one iota if much of the work is undertaken as an unemployment relief measure.

Battle With Bear

Boy Oves His Life To His Two Sisters And A Police Dog

A story comes from Peasane, Sask., that Pete Herrington, 14, owes his life to the bravery of his two sisters and to their large police dog. The lad, while hunting some cows, captivated a young bear cub behind a log. He stooped over to pick it up only to be struck a terrific blow by the huge paw of the mother bear which had come up behind the lad. The blow was so heavy that the boy was knocked unconscious.

Pete's two sisters, Florence and Marion, witnessed the affair and without any thought of their own safety they, with their dog, rushed forward. The dog made straight for the bear, grabbing it by the throat, and there ensued a battle for life. Meanwhile the girls were able to drag their brother to safety amid the barking of the dog, the growls of the bear and the shrill cries of the cub. The dog eventually drove the bear into the bush.

Pete is proud not only of his sisters and the dog but also of the marks of battle on his neck and back, which he proudly exhibits.

Will Continue Giving

Lord Nuffield, British philanthropist, in accepting a degree from the University of Sydney, Australia, said: "I promise to continue to do everything possible for the suffering and distressed."

Titled Cleric

Canada's Only Titled Clergyman Leaves For England

Sir Francis Heathcote, Archdeacon of Vancouver, was bound for England, slightly confused over the turn of events that have made him Canada's only titled clergyman.

Leaving Montreal for Quebec, where he boarded the liner Empress of Australia for England, the tall, handsome cleric who came to Canada from England in the 80's, told reporters he had little or no information on his inheritance.

He said his succession to Sir Gilbert Heathcote was bewildering because he had been so far down the line.

"I'm the sixth son of a third son," he said, "and there was also a nephew in between, but they're all dead now."

Sir Francis has no church in Canada, the Vancouver archdeaconate being an endowment of Lady Burdett-Coutts.

Ye Old Cheshire Cheese, famous old London inn, never employs a waiter named William, out of respect for the memory of Old William, favorite waiter on 18th century literary greats.

Thomas A. Edison's famed deafness came about when, as a boy, he ran after a moving train and a brakeman grabbed him by the ears to haul him to safety.

"GET A LINE ON OGDEN'S"

Tie up with a real treat! Roll-your-own cigarettes with OGDEN'S Fine Cut and you'll find a cooler, fuller smoking enjoyment that this cooler and more fragrant tobacco gives. You'll roll them even better if you make sure to use "Chanticleer" or "Vogue" papers.

Big Fleet For Russia

Soviets Plan To Greatly Increase Naval Power

Plans intended to make Soviet Russia, one of the great naval powers of the world are being pushed and should begin to bear fruit within the next four or five years.

Realising a great maritime Russia is not possible without a powerful high seas fleet, Soviet leaders have already completed the initial technical work which will give the nation a huge four-arm fleet grouped on the Baltic, White and Black seas and the Pacific ocean.

Equipment is now ready by which the nation should be enabled to manufacture big calibre guns up to 15.75 inches together with powerful protective armament. Foreign technical help will be used in the early stages of the construction period. The last two modern cruisers built at Leningrad were constructed with the aid of Italian engineers.

SELECTED RECIPES

ORANGE CREAM

2 1/2 cups milk
1/2 cup white sugar
1 tablespoon St. Lawrence or Durham Corn Starch
3 tablespoons orange juice
2 tablespoons lemon juice
1 tablespoon grated orange and lemon rind mixed
1/2 eggs separated
1/4 teaspoon salt
Add grated rind to juices and allow to stand. Scald 1 1/2 cups milk in double boiler. Add sugar and corn starch mixed with remaining cold milk. Stir constantly until thick. Boil 10 minutes stirring frequently. Add beaten egg yolks and salt. Cook 5 minutes. Add strained fruit juice and cool. Pour over cut up oranges sweetened to taste. Cover with meringue made of the stiffly beaten egg whites with 2 tablespoons fruit sugar. Brown slightly. Crushed pineapple is a nice addition to oranges.

No Infringement

Motion Picture Company Wins Appeal In Copyright Case

Use of a song title as the name of a motion picture does not constitute an infringement on that song's copyright, the Ontario Court of Appeal ruled.

Accordingly, it allowed the appeal of Twentieth Century Fox Corporation Limited against a judgment holding that company liable to Francis, Day and Hunter, song publishers, for \$1,946.85 for using the title, "The Man Who Broke the Bank at Monte Carlo," in a picture. Neither words nor music were used.

"The owner of the copyright suffered no wrong by what was done," said Mr. Justice Middleton, for the court. "The idea, if any, of the song's words and its music were not taken."

Turku and Viborg, in Finland, are centres of the ant egg industry, exporting eggs from their farms to pet dealers and zoos throughout the world.

A baby grand piano weighs about 450 pounds.

Radio Plays

Cash Prizes To Be Offered By Broadcasting Corporation

It is the intention of the Canadian Broadcasting Corporation to encourage Canadian authors to write purely Canadian radio drama, suitable for broadcast purposes, dealing with Canadian matters, and to obtain this sort of material it will offer cash prizes.

This announcement was made by Major Gladstone Murray, general manager of the Canadian Broadcasting Corporation, in an address to the Canadian Authors' Association, on "What Radio Has To Offer the Writer." A semi-independent board of adjudicators would be set up to decide on the material selected.

Major Murray told the association it was essential that radio work be done well. The spoken essay was the most important part of broadcasting. In this connection he referred to a recent successful broadcast of a story by Miss Mary Weekes of Regina, "The Last Buffalo Hunt," which was an example of the desired type of material. He also praised the broadcasts of Bruce Hutchison over CBO.

Quality of good radio writing should be its directness, simplicity and good use of Anglo-Saxon synonyms.

Sound of the language in a story broadcast was also a most important feature. Centre of the problem of radio broadcasts was the drama and the most successful so far had been adaptations of stage plays and novels. There had been some writing done purely for the radio, in Canada, but it had not been of very distinctive quality. There was a great and rich field for writing for the radio, dealing entirely with Canadian content. There had been some writing done purely for the radio, in Canada, but it had not been of very distinctive quality. There was a great and rich field for writing for the radio, dealing entirely with Canadian content.

"I place art always in the foreground," said Major Murray. Canada should not be an imitator of foreign writers.

Rupert Caplan, of the Canadian Broadcasting Company, Montreal, and well known producer of plays, said the opportunity offered to write good radio plays had not been taken up seriously by leading Canadian writers.

Mr. Caplan said the radio listener to-day wanted to be entertained, more than educated. Canadian radio authorities were searching for good radio material could not find enough of it. "It is not necessary to go up in the attic for it," he said. "It is all around you, in the home, on the street, in your every day life."

The Centre Of Unity

Throne Binds British Empire Together States Lord Tweedsmuir

Without the unifying power of the crown, none of the other ties which hold together the free, autonomous nations of the British empire would "bind for long," Lord Tweedsmuir said in an address at Bishop's college convocation in Lennoxville, Que.

"The throne is the centre of empire unity," the governor-general told the gathering at graduation exercises. "What is there in common between peoples who represent every race-stock on earth?" he asked. "Yet these differences are differences within a unity. The throne binds the whole empire together and gives cohesion to a vast growth whose ultimate destiny is unpredictable. There are other binding influences, such as the bonds of sentiment and blood and of tradition, but without the unifying power of the crown none of these would bind for long."

"Millions of dark-skinned peoples in Asia and Africa and the Isles of the sea, government means the person of the sovereign."

"The importance of the British monarch is not in 'what he does but in what he is,' said the governor-general. "We are a democracy in which the will of the people prevails by means of their elected representatives. But the king represents the people in a deeper sense—abiding continuity, a nation behind all the mutations and vicissitudes of parties."

"Britain has rebelled quite often against kings. But never against kingship."

Walt Disney has purchased the rights of "Alice in Wonderland" books for a film cartoon, according to the London Daily Telegraph.

TRY IT TOMORROW

On Its Way Out

Straw Hat As Summer Headgear For Men Seems Doomed

It used to be possible to date the beginning of summer by the burgeoning of straw hats. Some Monday morning the usual sober grays, blues and blacks would almost all have disappeared, and one swam along a city street in an undulating swell of flat-topped straws, with here and there a Panama drifting like help in the tide. In the afternoon, between 5 and 6 o'clock, there would be a heavy thunder shower. As the season passed, the hats grew dingier. Buttercups and goldenrod adorned the meadows, a few leaves were seen to have turned, and hat owners wondered if another cleaning would be necessary before the winds of autumn brought down the first premonitory flutter of felts and derbies. This year, however, felts have remained firm, and in some cases active, while straws have been sluggish.

Without taking sides in any controversy that may be brewing between the felt hat and the straw hat, one may regret this change. The straw hat, after all, demanded only a brief three months of life. It was not pretentious. The flat-topped sailor type gladdened many a sad heart when it blew off somebody else's head and went trundling down the street. It made a traidion of commuters all look alike, but their wives were generally able to get them sorted out. Is the straw hat doomed? Let us hope not.—New York Times.

Should Use Better Seed

Records Would Indicate Average Farmer Sows Indifferent Quality

Canadian farmers should take fuller advantage of the country's remarkable facilities for use of certified seed, says Dr. C. S. H. Barton, federal deputy minister of agriculture, told the Canadian Seed Growers' Association at Guelph, Ont. From 10 bushels of certified seed there can be produced in five years 7,500,000 bushels of certified seed, the official said. Yet much potential registered and certified seed is being sold on the market.

Canada's seed requirements in wheat, oats, barley, rye, peas, beans and buckwheat approximate 70,000,000 bushels annually. Of the 70,000,000 bushels, only one per cent of registered seed grain and less than three per cent of certified seed grain were available this year.

"Seed drill surveys, crop testing records and other sources of information indicate that the average farmer sows indifferent quality and mostly nondescript grain," Dr. Barton said.

A Hand-Printed Bible

Swede Has Completed Work He Started Seven Years Ago

After seven years' work, Gustaf Wenmull, a draughtsman employed by the Swedish railway company, has completed his own Bible having drawn 4,000,000 letters by hand. He started work on February 12, 1931. Each of the 1,612 pages took him between two and a half and three hours. Stockholm reports he has insured it for \$5,000.

Bamboo plants may grow as much as three feet in 24 hours.

Appeal To Youth

Earl Baldwin Urges Young People To Remains True To Democracy

An appeal to the youth of Great Britain to remain true to democracy in spite of the appeal of new systems was made in an address at Malvern college by Earl Baldwin.

"There are people in this country," the former prime minister said, "who feel disquieted at times because of the enthusiasm that they see can be generated in systems other than our own—and the readiness for sacrifice which they profess they do not see in this country."

"You have always got to remember that our constitution and our way of doing things are bone of our bone and you don't about over these things."

"We have inherited views and the freedom that goes with them, and the whole thing has been evolved through centuries, at times at the cost of blood."

"The systems that arouse this enthusiasm are brand new, and they make their appeal, but we have got to realize what we stand for, and that can be best realized by working, wherever you get a chance, with your own people."

"Democracy is a very backward system in many ways, and it is difficult to work because it will not work unless everybody does his duty."

Pleading in another part of his speech for a better education in the use of English, Lord Baldwin said that inferior language may drive out the good.

"I remember that when I was at Cambridge," he went on, "there were two rather well known clubs, one, Hawks, containing gentlemen of admitted ability, and one, called the Athenaeum, containing gentlemen who neither had nor affected to have an affection for racing."

The two clubs used to communicate on serious occasions, and it was alleged in Cambridge at that time that a letter had actually been despatched written by the only member of the Hawks who could write, to the only member of the Athenaeum who could read."

Saying that there was no finer task to be engaged in than that of giving to fellows who were going out to do the work of the world a knowledge and love of beautiful things such as were to be found in the English language, Lord Baldwin continued:

"I think that is very necessary at this time, because one of the less pleasant features of the jostling together of nations, and frequent and close intercommunication, and the growing rapidity of transport, is the exportation from countries of many of their best words and their admission into other countries without any tariff or prohibition."

"If you try to run together good currency and an inferior one, the inferior one will drive the good out of the country and you will be left with the dust stuff. It is exactly the same in language."

How Business Looks

Depends Good Many Times On How A Man Feels

Business is made largely by sentiment and yet we think sentiment is made by business. A man doesn't feel the way business looks; business looks the way a fellow feels.

We have known men who felt so sure of an order that they got it because they felt so sure of it; and we have known fellows who have lost an order because they were afraid they would. "As a man thinketh, so is he," and as he thinketh so sometimes, to some extent, is his business.

This is no time to earn your bread and butter by looking at it butter side down.—Anon.

Prince As Choir Singer

When the De Svenska Choir visits London shortly, a tall young man with steel-blue eyes smiling beneath a tuft of black hair, will be singing bass. He is His Royal Highness Prince Lennart Bernadotte, favorite grandson of the King of Sweden.

Nearly 50 totally or partially blind persons in the United States are engaged in writing as a means of livelihood.

Pennsylvania is still 46 per cent. forest land, despite its 10,000,000 population.

THE KING WATCHES HIS HORSES AT THE DERBY

An interesting picture of His Majesty the King (left) watching his horse "Licence" being saddled by his trainer before entering the Derby.

Could Name Them All

For Simpson Boy Got Thrill From Animals In Circus

Eight-year-old Edward MacGarra, of Fort Simpson, "out" for the first time, got his biggest thrill in Edmonton when he visited a circus. He was so astounded that he completely lost his voice for minutes at a time. To the amazement of newspapermen, performers and trainers, the eager child from the sub-Arctic recognized and named without one mistake every animal he saw.

"I like animal books—I know a lot about animals—lions and elephants are specially swell," he told questioners.

So they let one of the biggest elephants under the big top, pick up the shouting and laughing youngster and hold him on its trunk while cameras clicked.

He dropped everything, however, and scurried from the tent as soon as an airplane's drone sounded overhead. He just wanted to know what "kind of ship" it was.

The throne of the sultan of Turkey is of massive beaten gold, studded with diamonds, rubies and emeralds set in mosaic; it has been appraised at \$15,000,000.

Lower California has resources of silver, iron, copper and marble that have scarcely been tapped.

Friday The Thirteenth

Combined With Black Cat Nearly Brought Disaster To Aviators

The U.S. Army Air Corps has let the cat out of the bag—and it was a black one at that. Officers related how Colonel Jacob H. Rudolph and Master Sergeant George Mendel, of Maxwell Field, Ala., narrowly escaped injury Friday, May 13, because a black cat had stowed away in their plane. The men had gone aloft to practice instrument flying. Only a few hundred feet off the ground Colonel Rudolph found that his controls were jammed. With disaster imminent he looked back for Sergeant Mendel, who was tending the duplicate set of controls, but he wasn't visible. In a moment, however, the controls came free. When the colonel looked around again the sergeant was holding aloft the cat. It had crawled between the control column and the housing, completely "freezing" the control system.

After travelling over his territory in northern Canada as an airplane passenger for six years, W. L. McDonald, Alberta geologist, has decided to become a pilot "to save time."

This is the season when any good office man can take a pencil and sheet of paper and get rich raising chickens.

Not By Boasting

Good Salesmanship By Minister Won Convention For Toronto

J. H. Cranston, publisher of Midland Free Press, tells a good story about Rev. W. A. Cameron, of Yorkminster Baptist Church, Toronto—a story of good salesmanship. At a convention of the Baptist World Alliance in Stockholm a delegate from Washington, D.C., used the larger part of an hour in presenting Washington as the next convention city. When he had finished, Mr. Cameron rose to present an invitation from Toronto. He said he would just tell a story, which was: A pretty miss went to the confessional and said, "Father, a man kissed me." The priest said, "How many times my child?" "Father," was the reply, "I came to confess, not to boast." The story was received with tumultuous applause, and Toronto won the convention!

A marked aversion to women speakers in a Columbia University lecture course was explained by a male professor thus: "By the time a person has gone through the grades and high school, he no longer wants to be lectured at—or to—by women."

Straw hats have been driven into tree trunks and solid boards by the high velocity of the wind in a tornado.

Field For Writers

Canada's Vast Northland Is Rich In Material, Says Dr. Casswell

Canada's northland is a rich and virgin field for authors, Dr. Charles Casswell, deputy minister of mines and resources, said in an address to the Canadian Authors' Association at Ottawa.

Development of the fur trade and the mining industry should be a fruitful field of literature. A predominating strain of tragedy ran through the history of the northland and the lives of those who lived there.

"This tragic strain is only to be expected when you realize the nature of the country, its climate, and the severity of conditions under which people live," he said. "It is a hard country to live in and only the strong and vigorous can endure it or those who know no other conditions of life." The north moulded a kindly, generous, honest and hospitable people.

"Who is to occupy that vast country as a permanent home if we allow the native people to disappear?" he asked. "I look upon the Eskimo as the only people who can live contentedly on the northern fringe of this continent. These people, therefore, must be preserved."

History seemed to be against the possibility of preserving the northern natives. Where civilization touched a primitive people, that people usually went to the wall.

"It will be difficult to avert that end, but it must be done, even if it does curtail the opportunities of the white man in the north. Every step we take in the administration of the northwest territories is directed to that end, and even though we have to suffer the criticism of the newspapers and others who should take a broader view than they do."

Authors will find in the north names to stir their imagination, he said. Hungry Creek, Dead Man's Valley, Rapid of the Drowned, Tropical Valley and Bloody Fall have sinister sounds and "each would appear to have a story behind it which might make good copy."

"That curious group of place names—Resolution, Reliance, Providence, Enterprise, Good Hope and Confidence—must have been given in order to bolster up the courage of those who built these posts—courage to face what they felt was before them. This is no doubt the same idea as whistling in the dark."

British Housewife

Miner's Wife Is Honored At Nottinghamshire, England

Mrs. P. M. Millward, a miner's wife from Mansfield, Nottinghamshire, has been chosen from a list of 5,000 women as "the most representative British housewife."

Member of the women's section of the British Legion and of a choral society, Mrs. Millward was picked by the selection committee because she had been married 21 years, raised six children, was a good budgeter, found time for profitable interests outside her home and was "really happy."

Mrs. Dobbin Crawford, Liverpool surgeon, said: "A man and woman should marry for love, should be of the same social scale, the same age and interested in each other's pursuits and occupations."

Mrs. M. M. Bear, founder of the Wayfarer guild: "Domestic servants make excellent wives because of their training. Though men might walk out with factory girls, typists or clerks, when they wanted to settle down they showed a preference for domestic servants."

Robert Boothby, Conservative member of parliament for Aberdeen, warned bachelors not to marry until the girl of their choice proved she could cook.

Mechanical Heart Breathes

The mechanical heart Col. Charles A. Lindbergh built to keep organs alive outside the body has "learned" how to breathe, Dr. Richard Eng of the department of surgery of Columbia University College of Physicians and Surgeons, has reported.

Finland, which is nearly as large as California, is pockmarked with thousands of lakes, but is almost without mountains.

Transparent oil can be made of plastic have been produced.

HUNGARY CELEBRATES 900TH ANNIVERSARY OF KING'S DEATH

The 900th anniversary of St. Stephen's death is being commemorated in Hungary this summer, and for the first time since 1771, the most sacred relic of Hungary—the Holy Dexter—the embalmied right hand of St. Stephen, first King of Hungary, is being shown in the principal towns of the nation. Our photograph shows the arrival of the "Golden Train" at Estergom, carrying the relic in a special compartment with glass walls so that all the people may see it.

WORLD HAPPENINGS BRIEFLY TOLD

A new air mail route was recently opened from Prince George to Germanen Landing in northern British Columbia.

A national insurance bill was given third reading by the Australian house of representatives. The vote was 33 to 28.

The Duke of Gloucester, brother of the King, opened the 16th International Red Cross conference in London with an appeal for aid to innocent victims of war.

Pilot-Officer Colin W. E. Milburn of Prince George, B.C., attached to the Brize Norton Aviation school at Carterton, Oxford, was killed when his plane cracked up near Pillins.

Shortage of saleable grain at the lakeshead, reduction in prices are out and adverse general business conditions have combined to have many vessels tied up in ports of the upper Great Lakes.

A plan to make provincial medical organizations of the Canadian Medical Association is approved by seven of the nine provincial bodies represented at the national society's 29th annual convention at Halifax.

A monument to Jews who died with the allied armies in the Great War was inaugurated at Donaustrasse, France, by Naval Minister Cesar Campinchi with the pledge France would defend freedom for all races.

Espionage trials of 195 military and civil officials of government Spain, in which about half face the death penalty, have begun in Madrid, travellers from Spain reported recently.

Request for the Australian into livestock marketing was made in the House of Commons by Harry Leader (Lab, Portage la Prairie) and seconded by Rt. Hon. R. B. Bennett, Conservative leader.

DOUBLY USEFUL TO JUNIORS!

By Anne Adams

Smartest of the smart, Anne Adams' new Pattern 4604 serves a double purpose. It can be made up into a frisky daytime dress, or it can have an ankle-length skirt for summer parties or graduation festivities. When you're stretching dollars, wear a relief to know that both versions can use inexpensive cottons—gay percales or piques for one; sheer voiles or organizes for the other! Even if you are just learning to sew, you'll enjoy putting together the graceful skirt gored, and adding buttons and lace to the bodice. For the directions are extra easy to follow!

Pattern 4604 is available in girls' and junior sizes 6, 8, 10, 12 and 14. Size 12 short dress takes 3½ yards 36 inch fabric, and 1½ yards lace edging. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

FLIN FLON

"The Story of Its Finding and Position To-day"

By PHATT KUHN

TOM CREIGHTON
The man who discovered the Flin Flon Mine in 1915.

Just the other day we read again of Tom Creighton, the prospector who found Flin Flon.

He is now in charge of field crews for Hudson Bay Mining & Smelting Co. properties, and so is again actively in the prospecting game which he loves.

To our mind came the story we heard from Tom's lips one night in Flin Flon—the story of how he regained his health after four years' suffering from the crippling pains of arthritis.

To-day he is 64 and as active as a 35-year-old, lean, sinewy, hard muscled, and without a pain. Imagine that, after he was all twisted up in his toes, wrists and fingers, back, elbows and shoulders.

When Tom was twenty he fell 15 feet down an open hatchway and hurt his back, which went against him when arthritis struck.

Anyhow, when prospecting he weighed 165 to 168 stripped, and is now 144—his feeling being that a man should stay as close to the natural weight attained at 21 years of age as possible.

Tom searched everywhere with all kinds of specialists for an arthritis cure, and then he had of a Dr. Thilen in Denver, Colorado, who used natural methods. He went there in April, 1915, and between fasting, exercise, changing of the blood stream from acid to alkali, he spent six months, but came away like a new man, with a healthy body and only a little pain in one finger left.

I've watched Tom eating, and here's what his meals consist of: Breakfast—Two or three Shredded Wheat Flakes eaten dry, or with a little butter, chewed thoroughly and moistened through the natural saliva action. After that (and not with the Shredded Wheat) a good bowl of unsweetened fruit or a good helping of raw fruit.

Dinner—A dish of soup and a fresh vegetable salad.

Supper—Meat, salad, fresh vegetables and two cooked vegetables.

Notice anything strange about this diet?

Well, there's no tea, coffee, milk water or liquor on it, and Tom drinks only one half glass of water a day—in the morning, just half an hour before breakfast—and never drinks with meals. Says he's never thirsty either. Another thing, he never eats starches and proteins at the same time.

Perhaps you'll laugh at a prospector who paddles canoes, scrambles over rocks, does hard physical labor, taking exercise to keep healthy, but Tom does some special stunts like tensing the stomach and rotating the trunk one hundred times with a hane on each side of the colon.

He never felt better in his life, and while he was using glasses for reading before his treatment his eyesight has improved so much that the glasses are unnecessary now.

Just thought some of our readers might care to profit by the health hints given by Tom who spent years of time and thousands of dollars to find out just how to live properly, and it was so simple that anyone who follows this regime will certainly improve in health and strength. Most of us dig our own graves with our teeth, through eating too much.

I wonder how Tom feels now (I haven't seen him for a year) in charge of prospecting for Hudson Bay Mining & Smelting Co. who own Flin Flon, the mine he found twenty

years ago and which in 1937 produced:

Copper	57,688,485 lbs.
Zinc	68,912,224 "
Cadmium	308,735 "
Selenium	74,288 "
Tellurium	7,084 "
and of the precious metals:	
Gold	139,605 ounces
Silver	1,033,378 "

and remember that while there were 1,647,438 tons of ore mined from the Flin Flon last year, there are at present reserves blocked out for 15 years' more continuous operation. To-day there is no relief, talk of depressions and hard times in Flin Flon, Manitoba—the busy little city of 8,000 named after the mine and pay checks amount to about \$280,000 monthly.

Because the civic authorities insist that everyone must be self-supporting, don't rush to Flin Flon unless you have money enough to get back. The civic authorities are a little hard-bodied about doling out relief, because they feel that everyone should be self-supporting.

And that's the final end of our Flin Flon story—for the present at least—though we may give you another picture later on because the subject is so interesting and so important to the people who live in the West, particularly in Manitoba and Saskatchewan.

Ready To Make Proposals

United States Government Wants To Secure World Disarmament

Prime Minister Chamberlain told the House of Commons that the United States government had indicated it was preparing to make definite proposals to secure world disarmament.

Asked by Arthur Henderson, Labor, Great Britain, were willing to "join with the United States government in making definite proposals with a view to securing a halt in the arms race," Mr. Chamberlain replied tersely:

"The United States government have suggested they are going to make an attempt."

The prime minister refused to elaborate on this brief statement.

There are about 2,500 species of snakes in the world, and 300 of them are poisonous.

THE SCORIES OF CHEMISTRY IN EVERYDAY LIFE

By DR. H. LUTTLER.

Cellulose as a Chemical Raw Material

Much of the progress made in recent years toward better living is due to the chemist. Starting with raw materials found in nature, he has created hundreds of new products for our health, comfort and happiness. Working in the twilight realm of atoms and molecules, the chemist has found that cellulose is a fruitful raw material for making a material is at present put to more than 10,000 uses.

Cellulose is one of the most plentiful of nature's raw materials. Millions of tons of it are produced each year as the fibres or framework of practically all plants. Cotton "linters"—the short "fuzz" left on the seed after the longer fibres have been removed by ginning, and trees such as the spruce and fir, are the principal sources of cellulose used for chemical purposes.

Among the more important products based on cellulose are rayon for wearing apparel, acetate rayon for hosiery, acetone, and the pyroxylin plastics which are put to many uses—from scuffless heels for women's shoes to toothbrush handles.

Will Cost Ten Million

Rajah Of Bamra To Have A Buckingham Palace In India

With his dark eyes sparkling after an hour's foxtrox lesson, the 24-year-old Rajah of Bamra, told a Sunday Dispatch reporter in London of his plans to build a "Buckingham Palace" in his Indian State.

To be built in marble, with mosaic floors, lapis lazuli and onyx pillars and fittings, the cost will be £20,000,000 at least.

The palace is to have automatic lights which switch on and off the moment anyone enters or leaves the rooms, illuminated fountains which will play night and day, and two swimming pools in green and black onyx.

The Rajah is in England to see British architects and engineers.

"I want the interior to be as like Buckingham Palace as possible," he said.

The young palace-builder, with jewels worth more than £50,000 for his ceremonial turban, talked about London's stately stores.

He and his Prime Minister, A. K. Bose, have been making a tour of them.

"I have bought one or two 3d. and 6d. souvenirs," the Rajah said. "They are wonderful stores."

During his visit the Rajah has spent considerable time in two-penny Underground trips and in learning to dance.

Once a week special foods from his own cook at Deoga are flown by Imperial Airways to Croydon.

"It is a keeping most of the food that has been flown over for me to take with me to the Continent soon," explained the Rajah.

"I am very interested in dairy farming, and I am to visit Holland because I am told their dairies are some of the best in the world."

"When I return to India I intend introducing our electric robot system for our roads."

Then the slender ruler of Bamra, tiger-hunter in his spare time, hurried off to another twopenny Underground jaunt.

Health LEAGUE OF CANADA

TOPICS of VITAL INTEREST

by DR. J. W. S. McCULLOUGH

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to: The Health League of Canada, 103 Bond St., Toronto, Ont.

SUNDAY SCHOOL LESSON

JULY 3

JOSHUA: A CHOICE OF LOYALTIES

Golden text: As for me and my house, we will serve the Lord, Joshua 24:15.

Lesson: Numbers 27:15-23; Joshua 1:1-9.

Devotional reading: Psalm 119:1-8.

Explanations And Comments

Moses Appoints Joshua to Be His Successor, Numbers 27:15-23. Joshua had long been Moses' attendant, and when Moses was about to die he appointed Joshua to be his successor. Joshua's outstanding characteristic is given as that of a man "in whom was the Spirit"—he would carry out God's will.

Joshua Summoned to His Task, Joshua 1:1-6. Moses, the servant of God, died, and Joshua was summoned to take up the task where Moses dropped it and carry it toward completion.

"Moses my servant, is dead: now therefore arise, go over this Jordan, thou and all this people," this was the task before Joshua, to cross the Jordan and conquer and settle Canaan.

Allegiance to Jehovah Promised, Joshua 24:1-21. Joshua at once assumed command of the great host. He directed his officers to go through the camp and announce to the people that in three days they should cross the Jordan. It was spring and the melting snow from the mountains had caused the Jordan River to overflow its banks, but the mighty host under the command of Joshua was to cross over the Jordan. Encampment was made at Gilgal, five miles from the Jordan, and there memorial stones were erected to signalize the event. The siege and conquest of Jericho followed. Overconfidence led to repulse at Ai, but a second more carefully planned attack was crowned with success. Two successful campaigns followed. With chapter thirteen of the Book of Joshua the account of the settlement of the land begins.

Joshua began his farewell admonitions by reminding the people of God's care and help from the time of Abraham to that present moment when they were in possession of land on which they had not labored, of cities which they had not built, of vineyards and oliveyards which they had not planted. He told all this in the form of a story from Jehovah himself, thus stressing the fact that he and they were but instruments of the divine will.

Quickly the people declared that they would serve Jehovah, for he had done great things for them. "They think they perceive the secret of success: it is to keep the Lord ever with them. They are choosing the success that God brings rather than choosing God himself. Had he failed, they would have forsaken him" (F. W. Norwood).

Mounties in England

Enthusiastic Reception in London To Policemen From Arctic Circle

Lance-Corporal Norman George McDowell of the Royal Canadian Mounted Police, stationed at the door of Canada House in London for the first time, was surrounded by a large crowd blocking the entrance, seeking autographs, and taking photographs.

London's reception to the mountie, who spent seven of the last 11 years above the Arctic circle, was enthusiastic.

The London Evening News ran two pictures of Corporal McDowell and his wife and streamered its story: "A Mountie Exchange Lonely Yukon for Canada House Job."

The Boston Museum of Fine Arts has 138 pottery vessels from the tomb of Pharaoh Cheops' mother, Queen Hetep-her, who lived 5,000 years ago.

MORE BRITISH SHIPS ARE SUNK BY BOMBERS

Valencia.—Shortly after two British freighters were sunk by an aerial raider outside Valencia harbor, two new incidents involving British merchantmen were reported.

The British merchantman Gloxina, 3,336 tons, was said to have been attacked at sea, after leaving Valencia.

The freighter African Trader, according to wireless conversation overheard by ships in Valencia harbor, was downed over by an insurgent plane and instructed to proceed to Palma, insurgent base in the Balearic islands, or to take the consequences.

The African Trader, which had been damaged by Spanish insurgent warships last autumn while proceeding out of Bay of Biscay port, sent out a call for help picked up by the British destroyer Imogen. The Imogen sped to the African Trader's aid.

The seaplane was believed to have disappeared.

The Thorpeness, 4,789 tons, shattered by an aerial torpedo, went down with 7,000 tons of grain. The Sunion, 3,054 tons, formerly of Greek registry, was struck by incendiary and explosive bombs, burned for six hours and sank.

A British destroyer was ordered to remove the sailors, stranded here. One Chinese, aboard the Thorpeness, was the only life lost.

The attacking seaplane used a new type aerial torpedo launched almost at water level by the plane skimming the sea, thus hurling the torpedo at tremendous force into the side of the ship.

These attacks brought to 54 the total of air attacks on British ships since the Spanish war started—nearly half in the last three months.

The Thorpeness was pierced by the explosive amidships and lurched and sank within five minutes in 60 feet of water.

Chief Officer Norman Goater of Southampton managed to get away in one boat with 26 members of the crew. The captain, William Kermode, and eight others jumped into the sea.

The sea plane returned later and dropped explosive and incendiary bombs on the 3,054-ton freighter Sunion, firing her cargo. Flames from the ship lighted up the whole roads.

Captain Kermode swam a mile in his lifebelt to the Sunion which put out a boat to help rescue some of the Thorpeness' crew.

The Thorpeness' non-intervention observer, Jean de Mersuay of Paris, said the raider barely cleared the British vessel's masts before looting the torpedo which crashed into the engine room and tore a huge hole in the side of the ship.

It was the second attack on the Thorpeness during the Spanish civil war. She was bombed Jan. 20 in Tarragona harbor and four members of her crew killed.

The attack by the lone raider was similar to others in the recent series of attacks on British ships. The captain declared it was a "deliberate and premeditated attack to sink a British ship anchored at sea."

Field Has Been Opened

Empire Exchange Of Women Reporters Is Now Possible

Winnipeg.—Empire exchange of women reporters has been brought within reach of members of the Canadian Women's Press Club, Miss Isabel Armstrong, president, told delegates at the triennial convention here. The Empire Press Union has notified the club that the empire field was open to women reporters for exchange as well as men. Age limit for interchange of reporters is 35. The problem now was billets in the Old Country and overseas dominions, Miss Armstrong said.

Many Delegates Expected

Ottawa.—Acceptances from more than 1,000 delegates to the National Conservative convention here July 5, 6 and 7 have already been received from all parts of Canada. John R. MacNicol, joint convention chairman, said at least 1,800 delegates are expected, with several hundred visitors.

Queen's Mother Dies

Countess Of Strathmore, Mother Of Queen Elizabeth, Dies At Her London Home

London.—The Countess of Strathmore, mother of Queen Elizabeth, died at her London home. She was 76.

Lady Strathmore married the 14th Earl of Strathmore and Kinghorne 56 years ago. She was formerly Miss Nina Cavendish-Bentinck, a member of the family of the Duke of Portland.

The king, who returned from Weymouth where he attended home fleet manoeuvres, and the queen were at the bedside. The queen had remained in London to be near her mother. Lord Strathmore also was present.

A second daughter, Lady Rose Leveson Gower, flew to London from the Isle of Man and also was present when Lady Strathmore died.

When the engagement of their daughter, Lady Elizabeth Bowes Lyon, was announced to the then Duke of York, the earl remarked it was a "true love match" since the Strathmores never had aspired to court circles.

The countess was said to have been happiest when caring for Glamis castle, their Scottish seat where MacBeth is said to have murdered Duncan.

The king and queen, who had been in constant touch with the Strathmores, returned to Buckingham palace shortly after her death.

The Earl of Strathmore, who at 83 is tall and thin, happiest in rough tweeds pottering about his 24,700 acres, and the countess always lived in a retiring manner, most of the time at Glamis castle.

By Consent Of People

Former Woman Labor Minister Protests Socialists Government For Britain

Vancouver.—Rt. Hon. Margaret Bondfield, former Labor minister in the British cabinet, said in an address here she "believed" a socialist government would rise to power in Great Britain within a decade.

Speaking before the Canadian conference on social work here, Miss Bondfield said it was her opinion the socialist state would not come by violent revolution, but "by the consent of the governed through the maintenance of the principles of free speech, the right of public meeting and a free press."

"But," she continued, "if these healthy channels of democratic expression are thwarted or abused by vested interests on either side, by groups of people in a community who refuse to face the facts of modern industrialism, then the morbid story of revolution, repression and reaction must even to our democratic countries."

While improvement and extension of social services was being urged, the human problem of the right use of leisure had to be considered.

"The leisure thrust into the world by the improvement of productive processes has appeared for far too many people under the dead form of purposeless idleness," Miss Bondfield said.

Canada's Sheep Industry

Support Of Industry By Consumers Urged By Speaker

Calgary.—Support of Canada's sheep industry by consumer insistence on articles "made with pure virgin fleece wool rather than the shoddy" was urged by W. H. J. Tisdale, of Toronto, assistant general manager of Canadian Co-operative Wool Growers, Limited.

He told members of a service club that Canada's sheep population had not increased since 1867 but the number in Australia was five times as great as in 1860.

"The sheep industry has brought Australia back from the depths of depression more than once," he added.

Third Picture Finished

North Bay, Ont.—The Dionne quintuplets have finished their third motion picture and the film company location unit left for the south, with director-pleasing performances by the youngsters recorded on film. The company shot 20,000 feet of film during two weeks.

TO OPEN C.N.E.

Lord Stanley, British Secretary of State for the Dominions, who will come to Canada in August to officiate at the opening of the Canadian National Exhibition at Toronto. His grandfather, Lord Stanley, former Governor-General of Canada, opened the Canadian National Exhibition 50 years ago.

Insists On Amendment

Senate's Stand On Farmers Creditors Act Causes Stalemate

Ottawa.—The senate and the house of commons have stalemated on the act amending the Farmers Creditors Arrangement Act. An amendment to the measure made by the senate was rejected by the commons; but the upper house insists on its amendment, and the matter rests at that for the time being.

Customary procedure now is for the commons to ask for conference with the senate so attempts may be made to iron out the difficulty.

The bone of contention between the two houses is the clause the senate inserted into the bill to automatically terminate the Farmers Creditors Arrangement Act in all provinces except Alberta and Saskatchewan at the end of the present year.

The commons reason for rejecting this was that "it would cause hardship in other provinces."

The senate disagreed with the commons on that ground, holding "there is no further necessity for the act in any of the provinces after Dec. 31, 1938."

First In Century

Sailor Being Tried For Murder Aboard British Warship

Hong Kong.—The first trial for murder aboard a British warship in a century opened when Ordinary Seaman Edwin Dwyer, 19, pleaded not guilty before Judge and Jury to the murder of Leading Seaman Robert Dickinson, 29, aboard the cruiser Dorsetshire off Australia May 2.

The crown alleges Dwyer shot Dickinson after the latter discovered an offence Dwyer had committed.

Hoping to lift the Duke of York's Trophy and thereby create a precedent by being the first Canadians to win this international speed-boat trophy, two young Canadians, Charles Wheaton, left, of Toronto, and R. J. McInnis of Quebec, sailed from Quebec on the Canadian Pacific liner "Empress of Australia." Their craft were also on board, and they are named "Shadow II" and "Miss Quebec III."

Sensational Newspapers

Speaker Says That The Public Demands Details Of Crimes

Winnipeg.—If newspapers become sensational it is because the public demands details of crimes and tragedies, Isabel Ross, of the New York Herald Tribune, told a banquet audience.

The banquet was tendered members of the Canadian Women's Press Club, holding their triennial convention, by the Manitoba government.

The Herald Tribune writer said in Europe the American press is considered a hectic institution which runs to headlines, improper invasion of private rights and persecution of front page figures.

"The flight of the Lindberghs from their native country is the perfect argument in support of this theory and there seems to be no defence in this particular case," she added.

"But to show you the public was really the driving force in this particular case—the Herald Tribune felt that the humanities were so involved in this frightful kidnapping that they would refuse to print anything about the story at all except a five-line box each day, stating just that there were no new developments.

"We did this for a week but we simply couldn't keep it up. The paper was flooded with calls, letters and protests. Our readers insisted on getting all the facts."

Houses For Mining Town

Nova Scotia Is Building Small Settlement Under Co-operative Plan

Halifax.—A venture in co-operative housing was launched for the coal-mining town of Reserve by the Nova Scotia housing commission.

The project, believed the first of its kind in Canada, calls for construction of a miniature community on a large block of land at the Cape Breton island town. Financed by long-term loans through the commission, the scheme will start off with 11 houses, each with a garden plot.

Laid out on modern lines, the little settlement will have a parkway running through the property and a central area for use as a community garden and tree plot. There will be a large playground for children.

Monthly payments for interest and amortization will be exceptionally low and well within the means of the families concerned.

Valuable Book Sold

London.—A 212-year-old copy of "Gulliver's Travels" was sold at auction to the Rosenbach Company of New York for \$12,500. The volume was a part of the library of the late Lord Dunsay.

Six Aviators Killed

London.—Six Royal Air Force flyers were killed when two torpedo bombers plunged into the sea during night manoeuvres off Swettenham, Federated Malay states, the air ministry announced.

OFF TO ENGLAND AFTER SPEED BOAT HONOURS

THE SOLUTION OF JOBLESS PROBLEM ONE FOR OTTAWA

Vancouver.—Financial assistance of the federal government was essential to any solution of transient unemployed and indigent problems, W. R. Bone, social services administrator for Vancouver, told delegates to the Canadian conference on social work here.

Bone said there must be registration, not only of the unemployed and employables, but of the entire population of Canada so every person might be identified with the province or locality in which he was eligible for such social services as were available.

"We should also look nearer home to see whether our junior governmental bodies are not partially responsible for the present problem of drifters," he said, adding that many municipalities, unable to meet their relief problems, took a "short cut" by sending individuals and families to move elsewhere on the chance they might do better in a new location.

Mr. Bone urged federal recognition of the transient problem as not a passing phase but a "problem to be met only by concerted action and thorough regulation."

There should be co-operation between provinces for enforcement of uniform domicile regulations, to remove as far as possible the inducement to move by adopting "basic welfare allowances and services."

Railway Unification

Erroneous Ideas Have Been Circulated, Says D. C. Coleman

Ottawa.—No necessity exists for "public excitement over the alleged consequences of unification of the railways," said D. C. Coleman, vice-president of the Canadian Pacific Railway, told the senate railways committee.

Much of the misunderstanding in the public mind was due, he charged, to insidious propaganda intended to convince the public that any plan of unification necessarily involved line abandonment on a large scale.

The schedule of line abandonments filed with the committee had been prepared at the behest of the Duff commission in 1932, Mr. Coleman said.

"A suggestion that the savings from this source should be included was made by the royal commission directly by A. E. Warren, vice-president of the Canadian National, and myself, and I am, therefore, in a position to inform you accurately as to the origin of this discussion," Mr. Coleman said.

Erroneous ideas had been circulated that unification meant committing the country to the power of a heartless monopoly; the throwing out of work of thousands of men; the drastic curtailment of necessary services; the risk of adding to the government's obligations on railway accounts—any of which, Mr. Coleman, would be a real objection to unification.

"I can assure you that none can result from any plan of unification to which the Canadian Pacific would be a consenting party," Mr. Coleman declared.

Wheat Marketings

Canadian Wheat In Store Shows Heavy Decrease

Ottawa.—Canadian wheat in store for the week ended June 17 decreased 1,510,420 bushels from the previous week and 20,629,933 from the corresponding week a year ago, the Dominion bureau of statistics reported.

The amount in store was reported at 27,664,272 bushels against 20,174,682 the previous week and 48,294,205 for the week ended June 18, 1937. Canadian wheat in the United States totalled 927,000 bushels against 892,000 and 5,944,294.

Wheat marketings in the prairie provinces for the week ended June 17 totalled 808,455 bushels compared with 743,961 the previous week and 701,993 during the corresponding week a year ago.

Receipts by provinces with the figures for the same week last year in brackets: Manitoba, 111,435 bushels (\$6,741); Saskatchewan, 341,759 (\$82,558); Alberta, 350,260 (\$32,451).

Farmers Insured Against Rust Damage Through The Use Of Thatcher Wheat

Saskatchewan farmers have taken out insurance against heavy rust damage through using 367,000 bushels of Thatcher rust resistant wheat as seed this year, the Saskatchewan branch of the Canadian Seed Growers' Association reported at the annual meeting. Rust did \$750,000,000 damage to Saskatchewan wheat in 1932.

Reporting on the agricultural revolution in northeast Saskatchewan where farmers have found new prosperity through raising high-grade alfalfa, the report predicted a 2,000,000 pound alfalfa seed crop this year. Production of registered alfalfa seed during 1937-38 in Canada was 24 times that of the previous year.

Secretary W. T. G. Wiener of Ottawa, reported. This was the direct result of increased plantings in northern Saskatchewan coming into production. Stocks of the following crop varieties and strains were mentioned as registered for the first time in 1937: Wheat: Thatcher and Red Bobs; oats: Erban and Vanguard; barley: Nobar; flax: Redwing; soybeans: Kabott; corn: White Capet; Yellow Dent; millet: Crown and Empire; carrot: Chantenny and Nantes; pea: Prince of Wales; clover: Red Seeded; timothy: Swallow; swede: Wilhelmshagen (D.E.P.L.).

Production of grass, clover and alfalfa seed by Manitoba farmers has multiplied six times in the last three years. Revenue from those crops was \$75,600 in 1935 but in 1937 Manitoba farmers received \$466,000 from them, the Manitoba Seed Growers' Association said in its annual report. Manitoba is now producing more than half the home grass seed and two-thirds of the sweet clover production for Canada.

If farmers were as particular in the selection of their seed grain as they are in the selection of herd sires, there would be an "immediate improvement" in crop production, Hon. F. M. Dewar, Ontario minister of agriculture, said. There had been "too much haphazard production of cereal crops in the past."

Relief from drought conditions in the west should be followed by improvement in wheat seed quality, F. W. Townley-Smith of Lethbridge, Sask., declared in his presidential address.

Consideration of the export market was urged on the growers in their use of new varieties. Those who have no fear of rust should continue to use "our wonderful old standby Marquis," Mr. Townley-Smith said, "at least until such time as our overseas buyers have definitely told us that our new wheats are just as good."

Care should be exercised in growing more than one variety of wheat on one farm, he said, for "superior purity is a major problem among farmers. Meticulous check must be made on all machines to prevent mixing at seeding times, in the growing season, at harvest time and more particularly in threshing."

Champion Letter Writer

English Clergyman Who Wrote Thousands To Editors Is Dead
Hailed as Britain's champion writer of letters to the editor, Rev. J. P. Bacon-Phillips, who wrote more than 60,000 letters to editors in 50 years and carried a brief case full of pipes, tobacco, biscuits and foot ointment for trips, died at Burges Hill, England. He was 81 years old, and had written more than 8,000 letters to newspapers dealing with the superiority of nightbirds over pyjamas, the value of his own moustache as a germ-strainer, the value of his beard in keeping him warm in winter and cool in summer, social injustices, strange customs and little-known facts.

Spaniards who cross Andorra, the "pocket republic of the Pyrenees," on their way to take refuge in France, are weighted and pay a toll of six cents a pound, the average toll being about \$12.50 a man.

Any blue feather, if pointed to powder, changes to black.

Weird Remedies

John Wesley's "Plain And Easy Way Of Curing Diseases"

Among John Wesley's numerous works the most curious is his "Primitive Physic," published in 1747 as "a plain and easy way of curing diseases." "Primitive" was undoubtedly the operative word, and not even his most ardent admirers would today care to try some of the recommended remedies.

"The Asthma: Live a fortnight on boiled carrots only. It seldom fails," was one piece of advice. To prevent nose-bleeding, drinking "whey largely every morning" is recommended, but "in a violent case go into a pond or river. Tried." For whooping-cough the alternative to rubbing hog's lard on the feet before the fire is rubbing the back "at lying down with old Rum. It seldom fails."

Half a pint of raw water, morning and evening, does not sound an attractive cure for cramp. Much more romantic is the juice of marigolds; rubbed on warts "it will hardly fail."

Wesley's remedies are sometimes strangely alcoholic. He records the case of "a middle-aged man in the West of England (who) drank every day five or six quarts of cyder; and without any other medicine, was totally cured in a few weeks time of a dropsy long supposed to be incurable."

For consumption Wesley had fifteen prescriptions, including "every morning cut up a little turf of fresh earth, and lying down, breathe into the hole for a quarter of an hour. . . . Or, drink thrice a day, two spoonfuls of juice of Water-Cresses. This has cured a deep consumption."

For raging madness: "Set the patient with his head under a great waterfall. . . . Or, let him eat nothing but apples for a month. Or nothing but bread and milk. Tried."—The Manchester Guardian.

Unique Monument

Pays Tribute To Men Who Were Executed For Treason

Standing at Canada's Niagara Falls gateway, unveiled in its simple beauty of massiveness, is a monument, unique in Canada and perhaps in the world. For inscribed on it is worthy of honor are the names of 28 men executed for treason.

The monument, the Clifton Memorial Mackenzie King, was first conceived as a memorial to those 28 men executed for their part in the rebellion of 1837. These 28, together with their leader, William Lyon Mackenzie are now honored as pioneers of responsible government in Canada.

As the idea of the memorial took shape, vision broadened and the memorial became one to all the pioneers. The chief inscription reads: "This memorial was erected to honor the memory of the men and women in this land throughout their generations who have shown the wilderness, maintained the settlement, performed the common task without praise or glory and were the pioneers of political freedom and a system of responsible government which became the cornerstone of the British Commonwealth of nations."

Long Bicycle Tour

Native Of India To Attempt Trip Around The World

"I want to prove that a poor man can see the world provided he is physically fit. I do not want hospitality shown me in the shape of money; all I want throughout my adventure is a little food and shelter," said Manna Singh to a reporter before he left Calcutta for a round-the-world tour on a cycle.

When questioned how long the journey would take him, Manna Singh replied that he hoped it would not be for more than seven years.

"I am fully conscious what the project means," he continued. "There will be occasions when people will not be hospitably received. I hope, but in such an emergency I hope to earn my food and shelter by palmistry, cycle facts and delivering lectures in schools on my experiences."—Calcutta Statesman.

History Of A Fire

Pioneer Tells Story Of The Burning Of Vancouver

George H. Keffer, of Cobble Hill, B.C., answered an old question when he said he was accidentally responsible for the fire which raced through infant Vancouver June 13, 1886, to leave the little logging town of 5,000 population a heap of smoking ashes.

The story was told in the Cowichan Leader, weekly newspaper published in this Vancouver Island farming centre. Keffer said he reached the coast 53 years ago and took a contract to clear what is now Vancouver's west end.

"There was some dry brush which I thought might be a fire menace to the Indians," Keffer said, "so . . . I set fire to this brush to clean it up."

"While we were at dinner the cook came in and asked: 'Did any of you fellows set a fire along the beach?'"

"I said, 'Yes, I did.'"

"Well," says the cook, "come and look at it now."

"We got up from the table and went to look. The fire had got into slashings and had a start that was beyond anything we could do."

"We watched the fire with fear and trembling, and when the sun went down and the wind with it we were able to get back to the city—or the place where the city was."

"We could see that not a building was left standing, nothing but blackened stumps, a few bricks here and there, and wire mattresses and an old safe or two."

"This is the real truth of the burning of Vancouver, and I struck the fateful match."

Duty Of Parents

Faulty Up-Bringing Of Children Damaging To The State

Father of two children, Raymond Hennicker-Heaton, noted psychologist, shocked delegates attending the conference of the British Union of Practical Psychologists by branding as public enemies Nos. 1 and 2, parents of the growing generation.

"It is a pity we have to have parents," he said. "In Victorian times sentimentality about mothers was non-stop and it hasn't stopped yet. There were songs: 'What Is Home Without a Mother,' and 'A Boy's Best Friend Is His Mother.'"

"Yet in spite of all these eulogiums, who is the potential, the most deadly enemy of the boy? The mother is and the father comes a good second." Mr. Hennicker-Heaton attributed the present state of "chaos and unrest" to the faulty upbringing of the individual. The tragedy of the badly-reared child went beyond the individual. It was damaging to the state and to the highest development of the human race.

"Indeed, more children are ruined by parental love than lack of it," he said.

"I haven't much to say on behalf of father, except that he doesn't fall under false colors. He has nothing to live up to. No song extolled his virtues even in Victorian times. I remember only 'Father, Dear Father, Come Home With Me Now,' which is not so flattering."

Eggs will keep better if stored with the small end down.

Use Of Rocket Aircraft May Pierce The Veil That Hides Us From The Stars

Plant Disease Specimens

Growers May Send Specimens To Nearest Laboratory Of Plant Pathology

There exists in each province of Canada at least one laboratory where specimens of diseased plants may be sent for identification. The research workers stationed at these laboratories are employed on problems relating to the more troublesome diseases of the cultivated crops of the provinces in which their laboratories are located. Thus the workers in Saskatchewan are chiefly concerned with cereal crop diseases. At the same time most of these men have a general knowledge of the principal diseases of all the plants commonly grown in their region and if more detailed information is needed they know where to obtain it.

Growers whose crops are affected by disease may send specimens to the nearest laboratory of plant pathology for examination. Usually the plant pathologists are able to suggest means of controlling the infection although this is not always the case. There are certain plant diseases for which no satisfactory methods of control are yet known.

Those sending specimens for diagnosis can assist the plant pathologists considerably by observing certain rules in preparing the specimens for shipment, states R. C. Russell, Dominion Laboratory of Plant Pathology, University of Saskatchewan, Saskatoon. The whole plant should be sent if it is not too large. If the plants are small several should be sent. Specimens should be thoroughly dried before they are mailed so that they will not spoil in transit. Leaves and flowers may be pressed and dried between sheets of newspaper in order to preserve their shape and appearance. Each specimen should be carefully labelled with the place and date of collection and the name of the collector. Specimens may be placed between sheets of cardboard for protection from breakage in the mail. A letter should be sent explaining the nature and extent of the trouble as observed by the collector.

Information on plant diseases can be obtained from the Dominion Laboratories of Plant Pathology at Winnipeg, Saskatoon and Edmonton. A Los Angeles patrolman had brought in a negro woman somewhat the worse for wear and the desk sergeant, with his very best approval: "Liza, you've been browned for interlocking!"

"Data's fine!" beamed Liza. Boy, you can start right now!"

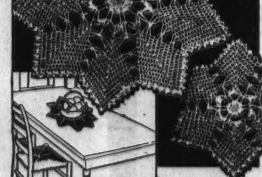

A single hair of a sheep's wool when seen under a microscope, is notched like a saw. Wool, kneaded and beaten, is held together by the interlocking of the notches, and felt is the result.

A 15,000-acre plantation in the Belgian Congo is to be devoted to growing cinchona, source of quinine.

Goodness Knows We All Need These

Household Arts by Alice Brooks

Exquisite Star Design Enhances Dollies of Three Sizes

PATTERN 6164

Author Told Proofreader Just What She Had In Mind

In one of her famous "Rebecca" stories, Kate Douglas Wiggin had written this sentence: "Rebecca sat by the window, chopping hash."

The proofreader put an interrogation mark after it, and added in pencil: "As hash is the finished product, was she not instead chopping meat and potatoes?"

When the author rallied from the effect of the comment she wrote her answer under the question: "There is a psychological moment when the meat and the potatoes blend into hash. It was this moment I had in mind."

For Denmark's Tall King

Fat members of King Christian's entourage must squeeze through the corridor of a new railway car so that the king will have room to sleep. The new coach was built with three inches less corridor room outside Christian's bed chamber so the king can lie down all the way. He is 6 feet 5 inches tall.

These stars of the dollie world are ready to shine together—on your luncheon table or separately on smaller tables! Crochet them in string, rayon or cotton. Fascinating pick-up work that's so useful, too. Pattern 6164 contains instructions for making the dollies; an illustration of them and of stitches; a photograph of dolly materials required.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

THIS BACKACHE IS AGONY

KIDNEYS WILL CAUSE IT!
 Strong kidneys let poisons pass out of your system. Leave back, lumbago, sciatica, rheumatism, kidney trouble, etc. Get more power to the kidneys the pills will give you. They are the only pills that cause the poisons that cause these ailments to leave your system.

GIN PILLS FOR THE KIDNEYS

WHAT HO!

CHAPTER XIV.—Continued

Crump came in.
 "Beg pardon, m'lady," he said, "but Captain Duff-Hooper sent his man over to say that he is riding at ten and will be pleased to have you join him."

"Ask him to tell Captain Duff-Hooper that I'm sorry but I shan't be able to ride with him," said Rosa.

"Very good, m'lady."

"And Crump, we're saved."

"The castle and everything. Mr. Bingley has come to our rescue."

"May I express my gratitude, sir," said Crump. "And I think you'll be interested to know that Elaine is in excellent working order except that she squeaks a bit when she wags."

"Oil her springs," said Ernest.

"I was about to do so," said Crump, and faded from the room.

In the kitchen Crump found Sloot lachrymatically polishing a silver fish-slice and whistling "Happy Days are Here Again."

"Less music and more elbow-grease, if you please," said the butler.

"But happy days are here again, Mr. Crump," said Sloot. "Today we are the last of that loopy Yank."

"I was not aware that Mr. Bingley intends to leave us to-day," said Crump.

"Well, I saw him packing his things, such as they are. Is he going to shoot the moon, do you think?"

"If, by that vulgar expression, you imply that Mr. Bingley is going to steal away without paying his bill, Crump said frostily, "you are doing a grave injustice to a most honorable gentleman."

"Well, he's going, and that's something," said Sloot. "Wonder what he'll do. Good riddance, I say. Happy days are here."

Sloot rose three inches from the floor on the top of Crump's toe.

"And if you'd like another dose of the same, young Sloot," Crump said, "just let me hear you pass any more remarks about Mr. Ernest Bingley."

In the breakfast room the earl was demolishing his third dish of codded eggs.

"Rather dreary this a.m.," he remarked. "He could not have meant himself."

"Oh, I dressed up for your birthday," Ernest said.

"Did you also pack your bag for my birthday?" asked the earl. "I fell over it in the hall."

"My month is up, you know, sir."

"Don't be a gum-drop," said the earl. "Stay with us as long as you like as our guest."

"Thank you, sir, but I just can't," said Ernest. "I'd like to, though, very, very, very much."

"Name just one good reason why

you won't stay on and at least spend Christmas with us."

"Business,"

"Business be blowed," said the earl. "Your people can take care of it. You can keep in touch with them by phone. If we had a telephone, tell you what—I'll have one put in."

"I'm terribly sorry," said Ernest. "But there is a matter which needs my personal attention. I must leave for New York at once."

"You'll be back, of course."

"Some day, I hope."

"Soon?"

"Not very soon, I'm afraid," said Ernest.

"You'll always be welcome at Bingley Castle, Ernest, old chum," said the earl.

"Thank you."

"Well, if you must go, you must go, I expect," said the earl. "When do you sail?"

"On the first boat I can get out of London."

"Will miss you," the earl said.

"Won't we, Rosa?"

"Yes," she said, her eyes on her eggs.

"You must keep in touch with us, Ernest," said the earl.

"Yes, sir."

"I collect souvenir post-cards, you know."

"I'll send you some."

"With Indians on them?"

"Yes, sir, with Indians on them."

"That's jolly good of you, Ernest. You must not forget us," the earl said.

"I'll never forget—Bingley Castle," Ernest said.

"Yes, sir."

"I wish you weren't going, Ernest."

"I don't feel as if I were going home," Ernest said. "I feel as if I were leaving home. Staying here was the most beautiful thing that ever happened to me."

"I'm glad you feel that way about us."

"I guess it was the most beautiful thing that ever happened to anybody."

"Will you write to me?"

Ernest did not look at her.

"No, Rosa, I won't," he said.

"You won't? Why?"

"I can't tell you."

"Because you must."

"It would be—well, it would not be right."

"Not right? Oh, Ernest, I think I understand."

"This matter of business you must attend to personally, don't you, Ernest—is it a girl?"

Ernest Bingley increased and crossed his hat. In a low voice he answered.

"Yes, Rosa. It is a girl."

"I don't think you'd be interested," Ernest said.

"Ernest! You knew—you should have known—I'd be interested."

"Why, Rosa?"

"It doesn't matter now. Are you engaged?"

"Secretly."

"When will you be married?"

"As soon as I reach New York."

"What is she like?" Rosa asked.

"You, I mean she has the same coloring and voice and eyes—and things," said Ernest.

"What does she do?"

"Do? Who?"

"Your fiancée, of course."

"Oh, I guess you'd call her a society girl," Ernest said. "Very social. Very athletic. Rides horses back, drives her own airplane—the usual things."

"How sporting! She must be painfully rich!"

"Oh, she is. Her father owns all the hotels in Chicago."

"All of them?"

"Except two."

"What's her name?"

"Her name?"

"That's what I said."

"Why it's Row—Rowena."

"Rowena?"

"No, just Rowena," said Ernest.

"Rowena what?"

Ernest hesitated.

"Surely you haven't forgotten," said Rosa.

"Of course not. It's—Castie—Rowena Minerva Castle."

"Pretty name. So you're going from one castle to another."

WILSON'S FLY PADS

REALLY KILL

One pad kills flies all day and every day for 2 or 3 weeks. 3 pads in each packet. No spraying, no stickiness, no bad odor. Ask your Druggist, Grocery or General Store.

10 CENTS PER PACKET

WHY PAY MORE?

THE WILSON FLY PAD CO., Hamilton, Ont.

Ernest's laugh was distinctly a fourth-rate expression of hilarity.

"That's right. Castle to Castle," he said.

"I hope she'll make you very happy, Ernest."

"I hope you'll be happy, too, Rosa."

"Oh, I'll have fun. No worries about the castle—ours, I mean. Lots of hunting and riding. Why shouldn't I be happy?"

"I suppose," said Ernest—"I suppose you'll marry yourself some day."

"Not myself. But I suppose I shall marry a man, if asked."

"Duff-Hooper?"

"He seems to be leading the field at the moment."

"You never get married right away, will you?"

"Maybe. Maybe not. I may shop around."

"I wish you would. I mean—well—wait."

"Why?"

"It would be awful for you to marry anybody—I mean anybody you were not terribly in love with."

"Let's stop talking about me," said Rosa. "You must start soon if you're in a hurry to get married."

"What can I do?"

"Where is he?"

"I wish he had to go to his study to get something."

"What?"

"A picture, perhaps," said Rosa. "I say, Ernest, you must have a picture of Miss Castle with you. I'd be most interested to see it."

"I haven't—I mean—well, I've a sort of picture," said Ernest.

"Please let me see it."

"All right."

He took from his suit-case the old miniature of Lucy Bingley.

"She's charming!" exclaimed Lady Rosa. "And she does look a little like me. Prettier, though."

"She is not."

"Why, Ernest! Is that any way for a bridegroom to talk?"

"It's the truth," he said.

"Never tell Rowena that," advised Rosa. "Why is she in fancy dress clothes?"

"Amateur theatricals."

The Earl of Bingley came hurrying toward them, bearing a large package. He presented it to Ernest.

"I want you to have this as a very slight token of my great esteem," he said. "It is not diamond. I wish it were."

"Thank you very much, sir," said Ernest.

Outside the door there was a sound like a riveting contest in a tunnel.

"I think I hear our car," said the earl. "So does most of Somersetshire, I expect. I say, Ernest, what's that picture?"

"His fiancée," Rosa told the earl.

"Really? Mind if I have a peek?"

He took the miniature of Lucy Bingley from Ernest's hand.

"Jove, she's lovely," he said. He stared hard at Lucy Bingley's comely face.

"I could think I've met her some place. Who is she?"

"Rowena Castle of Chicago," said Ernest. "And you could hardly have met her, sir. She's never been abroad."

The earl wagged his head over the picture.

"I met her twin sister then," he said.

"She has no twin sister."

"Wish she had," said the earl. He handed the miniature to Ernest who stood it in his bag.

Sloot opened the front door.

"The car is here, m'lud," he announced.

"I thought it wasn't woodpeckers I heard," said the earl. He held out his hand to Ernest.

Originator Of Idea

King Edward VII. Suggested Private Bath For Hotel Rooms

The late King Edward VII. was originator of the idea of every hotel room being equipped with private bath, Charles C. Ritz told reporters.

As Prince of Wales the king visited Paris frequently and stayed at the Bristol hotel. A bathtub was brought through the streets and carried to the royal chamber when the prince wanted a bath. The prince suggested to Cesar Ritz that a hotel with bath in every room "would be a paying proposition," and the idea was carried out when the Paris Ritz was opened, in 1898.

MAKE READY FOR HOLIDAYING

By Anne Adams

4799

If you're one of those people always on the go, you'll love Anne Adams' pattern 4799 the most useful outfit in your wardrobe.

Together, the three major pieces are ideal for going. With blouse and shorts, you're all set for tennis or the beach and both costumes can be varied with different sets of ash and kerchief. So simple to make! Just wait 'til you see how rapidly you can stitch up that neat "school girl" collar and handy pocket—that classically graceful skirt opening down the front for a good stride (and easy ironing)! Finish several sets in different colors and tub fabrics!

Pattern 4799 is available in misses' and women's sizes 12, 14, 16, 18, 20, 32, 36, 38 and 40. Size 16 entire ensemble, takes 5 1/2 yards 36 inch fabric and 1 1/4 yards contrast. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams' Pattern Dept., Winnipeg Newspaper Union, 170 McDermott Ave. E., Winnipeg.

Keeping cool used to be the idea for summer, now it's for Europe.

For Your Preserving

Use It This Year

New Operation Method

Fits Patients Back Into Circulation Without Loss Of Time

A method by which a Roumanian physician puts his patients on their feet directly from the operating table was described in the Journal of the American Medical Association.

"This new method is of inestimable advantage in time of war," the Journal's Bucharest correspondent reported on the work of Dr. Campescu, lecturer at the University of Bucharest.

"The evacuation of war hospitals thus becomes simplified. By shortening the stay of patients in the hospital, the surgical service of Campescu's clinic in Brasov were able, with the same number of beds, to accommodate 500 more patients than in the previous year."

The articles said in the period from 1904 to 1908, 3,150 patients left their beds the day following the operation without experiencing any disadvantage.

The article said:

"An assistant of Campescu whose appendix had been removed, after having stepped down from the operating table, forthwith acted as assistant at the next operation and afterwards walked about. His recovery was prompt."

The Alexandra Peal

Remarkable Bells Were Gift To British Empire 50 Years Ago

The ancient Society of College Youths sang the Alexandra Peal, some of the most remarkable bells in the British Empire, on the anniversary of the Coronation. The peal, which hangs in the Queen's Tower of the Imperial Institute, was a present 50 years ago from Mrs. Elizabeth at Millar, of Melbourne, the only condition of the gift being that the bells should be rung on the birthday and accession day of the Sovereign and the birthdays of the Prince and Princess of Wales. Each of the ten bells is named after a different member of the Royal Family. Their total weight is over eight tons, and when they are in full peal the tower of the Institute sways nearly a foot out of alignment.

The Romans noted the folly of growing the same crops on the same land for several consecutive years, but attention first was called to the value of crop rotation by Dethon, of Edinburgh, in 1777.

A new kind of paint made in Germany is said to be preapproved by having nitrogen salts and synthetic resin mixed in it.

Sporting Notes.

Mr A H Raduenz of Tomahawk has been chosen as umpire for the games in the ball tournament here tomorrow. Mr Raduenz has acted in this capacity for the past three years.

Army & Navy Cardinals replaced the Belmonts as contenders against the All Stars at the benefit ball game here on Sunday. There was a good attendance present, and the game got off on time with Mac Stewart as umpire. The friends of the club kindly supplied transportation for the players—Supt. Smith of the Federal Grain Co., bringing out an autoload of players from the City; as also did Mr Tony Dairmont. From the sale of tickets and gate receipts about \$400 was raised.

The game proved to have lots of action, with Eddie Enders and Irvine Goebel as pitchers and Art Laroque as catcher. The visitors proved too strong for the Stars, and won 13-6.

Stony Plain and District.

Mr Pat Peron, a 78-year-old pioneer of the North Onoway district, is visiting with friends in Stony.

Owing to the fact that the regular day for Dr Webster, Dentist, to visit Stony falls on July 1st, the Doctor will be in Stony Thursday, June 30, at his office over Larson's Lanch.

A board of examiners were here on Monday for the purpose of holding examinations of those engaged in the radio, electric and automotive trades.

The open hours at the local postoffice for Dominion Day are 2:30-3:30.

There is to be an in-between movie film shown at Kelly's hall on July 1st. The picture will be Jack Wayne in "The Dawn Rider." The time is 5:30.

The Bright Bank Woman's Association is having a picnic and bazar on July 6, with the usual run of sports, baseball, races, horseshoe, tug of war. Refreshment booth. Everybody welcome.

BUTTER AND EGGS WANTED at The Royal Cafe.

Spruce Grove News.

Mr and Mrs Albert Wood of Hinton Lake, Alberta formerly of the Clearwater district, announce the engagement of their daughter Alice Florence Wood to Mr Martin Konrad Kuhl, son of Mr. and Mrs Albert Kuhl of Spruce Grove. The wedding will be solemnized in Grace Lutheran Church, Edmonton, on Tuesday, the 5th of July—Leduc Representative.

Good progress has been made on the erection of the new parsonage for Rev J Berbusch, pastor of St Matthew's Lutheran church. The place will shortly be ready for the occupant. The building has been wired for lighting purposes, the work being done by Mr Barth.

Two of the Grove's best ball players, Messrs Elkin and Loeblich, who had been picked as members of the All Star team playing in the benefit game at Stony on Sunday last, were unable to be present. Mr Loeblich was playing with the Belmonts.

Blockade Against Light and Dust.

New modern production jobs necessitate the care and attention which go into the manufacture of X-ray film, for often telling in shadowy silhouette a story that may mean life or death, only the most perfect film, free of every blemish, can be relied upon. The 2 great enemies to the successful completion of the product are light and dust, says Geo. Stanley, writing in the current issue of the C-I-L Oval. Intrusion of either of these normally omnipresent phenomena at certain vulnerable stages of manufacture would prove ruinous to the product, and extraordinary precautions are taken to keep these out. All white light is cut off from 3 of the 4 major phases of film making; thus, almost three quarters of the works are smothered in a gloom equal to that inside a motion picture theater, where the machinery looms as vague shapes and the white coated workers perform mysterious tasks with uncanny accuracy. Elsewhere in the plant only super-conditioned air, purer than that into which Mt. Everest thrusts its peak, is allowed to intrude, while a non-stop janitor service keeps the areas as free from dust as a cake wrapped in "Cellophane."

CHEVROLET trucks are built in the West by Westerners for Western use. They're rugged, long-lasting, economical. They come in a wide selection of wheelbase lengths and body styles—and they're marked right down in the lowest-priced group.

If you intend to replace your present equipment, look into the remarkable record of Chevrolet trucks. Compare values from every investment angle. Above all compare delivered prices! You'll find Chevrolet the "buy" of the hauling field—and buying is made still easier through the convenient monthly terms of the General Motors Instalment Plan.

The World of Wheat.

By H. G. L. Simpson, Director Research Department,
Beagle Grain Co. Ltd.

Now the farmers with their teams, tractors, plows, discs, cultivators, are busy summerfallowing the land.

Summerfallowing is order to rest the land, or clean it of weeds, or conserve moisture for the following crop, is as old as agriculture itself. In China and in Britain, thousands of years ago laws were sometimes made setting out the properties of the land which had to be summerfallow or rested each year.

Summerfallowing has always been regarded as a kind of insurance premium a farmer pays with his time and loss of a year's crop, in order to ensure a certainty of good yields in the future.

In Western Canada, in districts which enjoy a good average rainfall, summerfallowing is usually done solely to destroy weeds. Most weeds, such as wild oats, are best killed when in the seed stage.

For conserving moisture, however, because even young weed plants use a good deal of precious rainfall, it is best to manage a completely black fallow—that is, not to let the weeds at any time appear above the ground at all.

Summerfallowing should be done as early as possible, of course, so that the rains which fall in June-July may be conserved.
